 QUANTUM KINETIC EQUATION FOR A MULTICOMPONENT PLASMA, tr. by R. P. Illwitzer. 27 Oct 60.

Trans. of Nauchnyye Doklady Vyshey Shkoly. Fiziko-matematicheskiye Nauki (USSR) 1958, no. 2, p. 189-191.

An approximate quantum kinetic equation is derived for a multicomponent system of charged particles under the assumption that exchange interactions are weak. Under certain conditions the derived equation coincides with the quantum kinetic equation proposed by Bogolyubov and Gurov (Zhur. Eksptl. i Teoret. Fiz. 17: 614-628, 1947; available in translation from MDF as MDF B-150) or the kinetic equation given by Landau (Physik. Z. Sowjetunion 10: 154, 1936) or the Fokker-Planck equation for a multicomponent plasma (Zhur. Eksptl. i Teoret. Fiz. 31: 1021, 1956; this journal is translated cover to cover by API). (See also 60-12509, 60-21595). (Physics--Theoretical, TT, v. 5, no. 11)
